- OBGYN Residents
- Nurses & Midwives

This interactive and innovative CPD program will provide timely and clinically relevant updates on selected topics in all areas of obstetrics and gynaecology, including:

- Maternal Fetal Medicine
- Reproductive Endocrinology
- Gynaecologic Oncology
- Gynaecology
- Obstetrics

Dr. D.A. Boyes

43RD D.A. BOYES SOCIETY DINNER

THU, NOV 2 @ FAIRMONT HOTEL VANCOUVER

It is with great sadness that we share with you the news of Dr. David Boyes passing earlier this year.

Dr. David Boyes, the former Head of the BC Cancer Agency, developed the first organized program in the world to screen for cervical cancer in collaboration with Dr. H.K. Fidler. By 1960, thanks to his pioneering efforts in training physicians and technologists in the program and promoting it to women, cervical screening became available free of charge to every woman in BC over the age of 20 years. The program led to a decline of over 70% in incidence and mortality of cervical cancer. It was the most successful population screening program anywhere in the world and remains a model for cancer control.

In addition, Dr. Boyes, along with Dr. Michael Turko, was the first in the world to develop the cone biopsy method of investigating and removing the abnormal cells detected through the Pap smear examination. He traveled throughout the world demonstrating the methodology to physicians.

Furthermore, Dr. Boyes was one of the first to take research directly to the patient's bedside, a system now an integral part of the BC Cancer Agency's mandate and known as translational research.

He had an impressive list of medical publications to his credit and was recognized an officer of the Order of Canada and the Order of British Columbia and was awarded the Canadian Medical Association's FNG Starr Award, an honour shared with Banting, Best, Collip, and other legendary figures of Canadian medical history.

He will be greatly missed by his former students, colleagues and admirers.

David Alexander Boyes
OC, OBC, MDCM, FRCSC

1925 - 2017
