Advanced Trainees Guidelines

As of 2019 DARPT will not be automatically appointing Advanced Trainees as Clinical Assistant Professors.

DARPT will review each Advanced Trainee and based on their previous work and will make a recommendation to the Dean's Office. This will either be at the Clinical Instructor or the Clinical Assistant Professor level.

If the recommended rank is for Clinical Instructor the appointment will be for one year in the first instance. At the end of the one year DARPT will review the trainee and if appropriate will recommend promotion to Clinical Assistant Professor for the next year. If they have not met the criteria for promotion we will reappoint at the rank of Clinical Instructor for the further year of their program.

If the recommended rank is for Clinical Assistant Professor the appointment will be for the two year duration of their program.

This decision was made by the DARPT Committee on 17 May 2018. This decision was made in order to ensure there is fairness when recruiting new Clinical Faculty members.

Advanced Trainees who will be starting in late summer/early autumn of 2018 will be appointed for two years at the rank of Clinical Assistant Professor for two years.

This new process is for the next intake in 2019.

If you have any questions please direct them to the [Administrative Director](#).
