Events, Workshops, and Seminars

(1) **NEW! Artificial Intelligence (AI) Workshop.** (Intel) How to leverage data with AI is on everyone’s mind. At this one-day workshop you will learn about AI methodologies as well as AI optimization tools and techniques, that can be applied to Intel Xeon® processors as well as learn about some of Intel’s upcoming products that can be leveraged for AI. At the live demos, you will learn how to optimize deep learning codes to accelerate computing applications. **September 18, 2019 from 8:00am to 1:00pm** at UBC Frederic Lasserre (LASR) 102. [Get your FREE ticket here.](#)

(2) **NEW! The 45th Annual D.A. Boyes Society Meeting & Obstetrics and Gynaecology Clinical Review.** (UBC FoM CPD) **November 7-8, 2019.** The full-day D.A. Boyes Society Meeting dedicated to knowledge translation in Gynaecologic Oncology will be preceded by a one-day Clinical Review course in Obstetrics and Gynaecology. Early bird [registration](#) ends Monday September 23, 2019.

The program will provide a timely and clinically relevant update on selected topics in all areas of OBGYN including Maternal Fetal Medicine and Reproductive Endocrinology. **Thursday November 7, 2019 – Obstetrics and Gynaecology Clinical Review.** **Friday November 8, 2019 – 45th Annual D.A. Boyes Society Meeting.** This event is an Accredited Group Learning Activity (Section 1) as defined by the Maintenance of Certification Program of the Royal College of Physicians and Surgeons of Canada, and has been approved by UBC CPD for up to 13.5 MOC Section 1 Group Learning credits. Each physician should claim only those credits accrued through participation in the activity.

(3) **NEW! Dr. Fred Bryans Faculty Forum (FBFF) 2020.** (UBC OBGYN) **Save the date!** The next FBFF will be held on Thursday, **January 30, 2020 from 9:30am to 5:30pm** at the Sheraton Vancouver Wall Centre Hotel. “Obstetrics and Gynaecology in the Digital Age: Artificial Intelligence and Machine Learning and the Future of Women’s Health Care”. The objectives of the 2020 FBFF are to: (a) highlight the opportunities and innovation that AI and Machine Learning can bring to our specialty, (b) showcase the spectrum of research of our faculty, (c) share lessons learned from engaging with community members and policy makers, and (d) cultivate new collaborations across specialties. MOC Section 1 Group Learning credits to be advised.

(4) **Patient-Oriented KT.** (PHC / BC SUPPORT Unit) As part of the PHC Knowledge Translation (KT) Community of Practice, Lynne Feehan from the BC SUPPORT Unit will be presenting on **September 17, 2019** about the relationship between patient-oriented research and knowledge translation. This event is also available via webinar. Find the details on our [website](#).
(5) **Shaping a Healthy Future for Young Women.** (WHRI) **September 19, 2019** from 7:00 to 8:30pm at the Italian Cultural Centre (3075 Slocan St.). Join us for a back-to-school, free public health event. Find out what it takes to ensure a healthier future for the young women in your life. Featuring Dr. Liisa Galea (MC), Dr. Monika Naus (cervical cancer prevention), Dr. Dzung X. Vo (mental wellness), Ms. Nicole Pasquino (sexual health), and Dr. Sarah Moore (physical activity). [Check out our Facebook page](https://www.facebook.com/events/433344885165171/) or [Register](#) for the event.

(6) ***Sent on behalf of WHRI*** *** The BC Women’s Research Rounds*** feature investigators who specialize in the area of women’s health. Come hear the latest in women’s health research every third Friday of the month at 8:00 am. The next presentation will be on **September 20, 2019**. Drinks and snacks are provided.

Subject: BC Women’s Research Rounds  
Title: Discovering ME/CFS: How epidemiology and clinical research can help  
Presenter: Dr. Luis Nacul  
Date: September 20, 2019, Friday  
Time: 8:00am – 9:00 am  
Location: Room D308 – Shaughnessy Building  

Goals/Learning Objectives:
1. The epidemiology of ME/CFS  
2. Challenges in diagnosing ME/CFS  
3. Approaches to research in ME/CFS  

“The BC Women’s Research Rounds is a self-approved group learning activity (Section1) as defined by the Maintenance of Certification Program of the Royal College of Physicians and Surgeons of Canada”.

Videoconferencing Sites:  
UBC-Okanagan VC: UBCO RHS 129  
Vancouver General Hospital VC: VGH DHCC 2262  
Northern BC VC: UHNBC UHNBC 5005  
Northern BC VC: ARC MMH 1020  

How to attend remotely:  
Note: **Use a computer.** Mobile devices (smart phones, tablets) are not supported.  
- **Web-browser:** In Chrome browser, go to [http://meet.vc.ubc.ca](http://meet.vc.ubc.ca) and enter the ID **30338**. For instructions and troubleshooting, see the [Web Browser User Guide](#).  
- **UBC Skype for Business** (account holders only): In the Contact box, enter <30338>@vc.ubc.ca to join the meeting. Refer to the [troubleshooting guide](#).  
- **Telephone** (Audio-bridge): Dial toll-free phone number, 1-844-651-2007, followed by ID **30338**, followed by #  
- MedIT Service Desk (Monday-Friday, 7am-5pm): For remote technical assistance during the session, please call 1-877-266-0666

(7) **Northwest Gynecological Cancer Symposium 2019** will be held **September 25, 2019** from 8AM to 7PM at **U of Washington, Seattle**. [Submit an abstract](#) (deadline **July 15, 2019**). **Registration** includes participation in all events including catered lunch and reception.
There is NO FEE for registration. Individuals submitting abstracts will be automatically registered.

(8) Practicing Knowledge Translation (PKT) course. October 7-11, 2019. Are you interested in learning how to implement practices using comprehensive methods and the best available evidence? The Li Ka Shing Knowledge Institute of St. Michael’s Hospital is accepting applications for their upcoming 5-day course on Knowledge Translation (KT). Apply now (deadline August 8, 2019).

(9) 2019 Clinical Research Ethics Symposium. (Research Ethics BC) October 16, 2019, from 8:30am to 4pm. The full-day event is intended to offer an opportunity for REB members and the research ethics community at large (including clinical researchers and patient partners) to discuss current topics of interest including the newly updated TCPS 2 (2018), incidental findings, ethical concerns surrounding the opioid crisis, and harmonized clinical trials. Refreshments and lunch will be provided. Free registration via Eventbrite here.

(10) Putting Patients First 2019 conference. (BC AHSCN) November 20, 2019 at the Marriott Vancouver Pinnacle Downtown. An annual conference hosted by BC SUPPORT Unit designed to encourage learning and collaboration between patients interested in patient-oriented research (POR), health researchers, health care providers and health system decision makers.

Awards and Funding Opportunities

(1) NEW! 2019 Mitacs Awards. Application deadline: September 30, 2019. The Mitacs Awards are back with some exciting new developments – 2 new award categories. The Awards recognize outstanding students, fellows, and professors who have demonstrated excellence and leadership during work supported by the Mitacs Accelerate, Elevate, or Globalink programs. To learn more about the awards or to submit your nomination, go to: www.mitacs.ca/mitacsawards.

(2) NEW! CIHR: Personalized Health Team Grant. LOI deadline: October 8, 2019. Full application deadline April 7, 2020. Approximately six (6) grants will be awarded, and the maximum amount per grant is up to $500,000 per year for up to 4 years. The Personalized Health Team Grant funding is expected to: (a) optimize patient/individual empowerment in personalized health care and prevention approaches, (b) assess the value of personalized health care for effective implementation and delivery, (c) generate exemplars that can be used to facilitate future implementation of personalized health approaches, (d) integrate sex, gender, and intersectional considerations in the delivery of personalized care approaches, as well as ethical, environmental, economic, legal and social aspects, and (e) implement personalized health solutions that incorporate predictive analytic methods and eHealth delivery platforms in health delivery organizations.
(3) **NEW! CIHR: Patient-Oriented Research (POR) Impact Assessment Grant.** Application deadline: October 22, 2019. Approximately twenty (20) 1-year grants of up to $50,000 each will be awarded. The POR Impact Assessment Grant funding is expected to: (a) increase Canadian capacity to measure the impact of POR in order to demonstrate the extent of health, social, and economic benefits realized through POR, and (b) increase the literature currently available on the impact of POR in Canada in order to enable summative evaluation and meta-analyses on the impact of POR as well as demonstrate how POR compares to other health research approaches in terms of the potential to translate evidence into the health care system.

(4) **NEW! CIHR: Patient-Oriented Research (POR) Awards – Transition to Leadership Stream Fellowship, Phase 1.** Application deadline: November 14, 2019. The Strategy for Patient-Oriented Research (SPOR) is a national coalition of federal, provincial and territorial partners (patients and informal caregivers, provincial health authorities, academic health centres, charities, philanthropic organizations, private sector, etc.) dedicated to the integration of research into care. The aim of the POR Awards – Transition to Leadership Stream is to support the timely career launch of the next generation of patient-oriented researchers. The duration of the award is fixed at 6 years and is comprised of 2 phases: Phase 1 provides funding for a stipend and research allowance, including professional development training; Phase 2 provides a contribution to the salary and research allowance. This funding opportunity is for the Phase 1 portion of the award; it is directed towards promising trainees who will be ready to transition into an independent POR career within 2-3 years from the start of this award. Approximately twenty (20) fellowships will be awarded.

(5) **Alfred P. Sloan Foundation: 2020 Sloan Research Fellowships.** Nomination deadline: September 16, 2019. The Sloan Research Fellowships seek to stimulate fundamental research by early-career scientists and scholars of outstanding promise. These 2-year fellowships are awarded yearly to 126 researchers in recognition of distinguished performance and a unique potential to make substantial contributions to their field. The 2020 Sloan Research Fellows will receive fellowships in the amount of $75,000 each.

(6) **CIHR/NSERC/SSHRC: Banting Postdoctoral Fellowships.** Application deadline: September 18, 2019. The fellowship is valued at $70,000 per year for a 2-year period. Successful applicants will positively contribute to the country’s economic, social and research-based growth.

(7) **UBC: Grants for Catalyzing Research Clusters (GCRC).** Notice of Intent (NOI) deadline: September 23, 2019. Application deadline: November 12, 2019. Fostering collaboration is a central priority in UBC’s new strategic plan (Shaping UBC’s Next Century). The Grants for Catalyzing Research Clusters (GCRC) competition was jointly created by the Vice-President Research & Innovation and the Provost & Vice-President Academic to enable the formation and growth of interdisciplinary clusters of research excellence. Researchers from all disciplines are invited to apply.

**Award Details:** We invite applications led by PIs from all disciplines who seek to propel their clusters towards global leadership. Applicants will be asked to self-identify on the application if the proposed cluster should be considered
as Emerging or Established. Emerging clusters may request an award up to $100,000 per proposal (and up to $15k trainee supplement). Established clusters may apply for awards up to $200,000 (and up to $30k trainee supplement). Applications must include a strong budget justification that aligns specific activities with goals and expected outcomes. A total funding envelope of $4M is available for this competition.

Generalized characteristics and potential catalytic activities are presented here for illustrative purposes:

(8) **HRF Artificial Intelligence Health Research Fellowships**. Application deadline: September 27, 2019. In 2019, the Health Research Foundation (HRF) of Innovative Medicines Canada will award TWO (2) research fellowships in the area of Artificial Intelligence (AI) Health Research in its impact on health care in Canada. One of the fellowships will focus on AI’s impact on health system sustainability, while the second fellowship will focus on AI’s impact on patient outcomes. The objectives of the HRF fellowships is to support outstanding MD and/or PhD researchers to become future scientists and healthcare leaders, and to facilitate collaboration, teamwork, and trust between academic research centers and the pharmaceutical industry to find better ways to transfer knowledge from research to the health system. Each fellowship will have an award of $100,000. Review the fellowship application guidelines and download the fellowship application form here.

(9) **Excellence in Patient-Oriented Research (POR) Award**. Application deadline: September 30, 2019. The BC SUPPORT Unit is partnering with VCHRI to launch the Excellence in Patient-Oriented Research (POR) Award. The purpose of this competition is to promote excellence and build capacity for patient-oriented research for clinician scientist investigators located at the Vancouver General Hospital, UBC Hospital, Richmond Hospital and G.F. Strong Rehabilitation Centre. Applicants are eligible if they hold an active VCHRI Investigator award. An information
session will be held on September 9 for interested applicants – sign up for the information session.

(10) Baillet Latour Grant for Medical Research (Baillet Latour Health Prize) / Le Prix de la Sante 2020. Nomination deadline: September 30, 2019. This personal award of €250,000 is granted every year for outstanding achievements in biomedical research for the benefit of human health, to recognize scientific merit and to stimulate scientific research and intellectual creativity. The theme for 2020 will be “Metabolic Disorders”. Go to the online Application Form.

(11) UBC: Faculty Research Awards (various). Nomination deadlines: September/October 2019. These awards are valued at between $3,000 and $15,000 and serve to recognize individual investigators who demonstrate excellence in research.

(12) CIHR: CIHR Fellowship 2019-2020. Application deadline: October 1, 2019. Supporting applicants at the post-PhD or post-health professional degree stages. The awards consist of a stipend and a research allowance. The maximum amount awarded for a single award is up to $60,000 per annum for up to 5 years – the value and duration of each award will be determined by the degree(s) held, licensure (where applicable), location of tenure, and experience of the applicant.

(13) Gairdner Foundation: 2020 John Dirks Canada Gairdner Global Health Award. Nomination deadline: October 1, 2019. The prestigious John Dirks Canada Gairdner Global Health Award recognizes the world’s top scientists who have made outstanding achievements in Global Health Research.

(14) CIHR: CIHR Sex and Gender Science Chair – Application deadline: Oct 8, 2019. Funding up to $175,000 per year for 4 years is available to support applications that seek to grow the science of sex and gender research.

(15) CIHR Institute of Human Development, Child and Youth Health (IHDCYH): 2019 IHDCYR Talks Video Competition – Application deadline: October 15, 2019. This competition is intended to improve knowledge translation (KT) of research within the Institute’s mandate and/or strategic research priorities. There will be funding for ONE (1) first-place prize of $3,000, ONE (1) runner-up prize of $1,000, and TWO (2) specially-commended prizes of $750 each. Read the news announcement here. Read the July 3rd CIHR News Announcement here.

(16) CIHR/SSHRC/NSERC: Canada Graduate Scholarships – Doctoral (CGS D) Program – Application deadline: October 17, 2019. Awards valued at $35,000 per year for up to 3 years are available. Joint programs with a professional degree (e.g., MD/PhD, DVM/PhD, JD/PhD, MBA/PhD) as well as clinically oriented programs of study, including clinical psychology, are eligible if they have a significant autonomous research component.

(17) CIHR: Women’s Health Clinical Mentorship Grant – Application deadline: October 22, 2019. Twelve awards each of $50,000 (1 year) are available. The purpose of this funding opportunity is to advance clinical research in women’s health and to build capacity in the next generation of women’s health clinician-researchers. The aim is for trainees, students or
Residents to be paired with and mentored by a women’s health clinician-specialist on a one-year research project with the goal of improving clinical care.

(18) CIHR/NSERC/SSHRC: Vanier Canada Graduate Scholarships – Application deadline: November 6, 2019. Valued at $50,000 per year for 3 years during doctoral studies. Application open to Canadian citizens, permanent residents, and foreign citizens. Areas of research eligible for funding support include Health Research, Natural Sciences and/or Engineering Research, and/or Social Sciences and Humanities Research.

(19) CIHR/NSERC/SSHRC: Healthy Cities Research Training Platform (HCRTP). LOI deadline: December 10, 2019. Approximately SIX (6) developmental grants each of up to $25,000, and ONE (1) full application grant of up to $825,000 per year for up to 6 years, are available. The purpose of this funding opportunity is to facilitate the development of an interdisciplinary, cross-sectoral training initiative that will generate cutting-edge knowledge and build capacity for implementation science and solutions-based research. This funding opportunity will support a team in designing and delivering a national research training initiative focused on how to create, implement, and scale innovative, solution-based interventions in a variety of urban contexts focused on promoting healthy, resilient, sustainable and equitable cities. Accomplishing this goal will require experts from diverse disciplines including public health, epidemiology, economics, sociology, law, ethics, engineering, environmental science and urban planning, which is why partnership across the three research funding agencies is essential. The application process for the HCRTP will consist of a Letter of Intent (LOI) stage, where up to six successful applicants will receive developmental grants, and a Full Application stage where one application will receive the full grant. The HCRTP is a major component of the CIHR Healthy Cities Research Initiative (HCRI).

CIHR/NSERC/SSHRC will be holding an informational webinar on September 23, 2019 from 10am to 12pm.

(20) Did You Know?... VCHRI: Research funding opportunities (various). VCH Research Institute offers a variety of internal awards and funding competitions for individual investigators and teams. Learn more about upcoming awards, including application deadlines: Investigator Award, Innovation and Translational Research Award, Knowledge Translation Challenge, and Team Grant.

(21) Did You Know?... Are you a health researcher who's looking for funding opportunities in patient-oriented research? The BC SUPPORT Unit maintains a list of grants that might be of interest to you. Visit our Funding Opportunities page at bcsupportunit.ca/news/funding-o... to learn more!

(22) Did You Know?... PlanH, implemented by BC Healthy Communities Society (BCHC), facilitates local government learning, partnership development and planning for healthier communities where we live, learn, work and play. Working together with health authorities, UBCM and the Ministry of Health, PlanH supports the Province’s health promotion strategy. Plan H understands that finding and securing funding that is relevant to the needs of your community can be challenging. In order to better assist you in developing your healthy community projects and/or programs, PlanH has compiled a list of funding opportunities
that might be worth knowing about, along with guides and resources to support your grant writing activities: navigate to https://planh.ca/training-support/other-funding-opportunities then click the drop-down from “Health Research” for a list of health research-related funding opportunities.

Research Resources and Other News etc.

(1) (CIHR/NSERC/SSHRC) Tri-Council Policy Statement: Ethical Conduct for Research Involving Humans - TCPS 2 (2018): CIHR, NSERC and SSHRC have recently updated their joint policy to promote the ethical design and conduct of research involving humans. Read more...

(2) RECRUITING: P2RISM (Pregnancy and Pediatric Reference Intervals for Safe Medicine) is an initiative to improve lab test interpretation for mothers and neonates, developing and using a patient-centered study protocol. Working with the lab, blood from healthy moms and their babies will be collected after delivery (at the same time as NBS/bilirubin screening sampling). How can you help? We are asking that health care providers be aware of P2RISM, display study materials in patient areas, let their patients know about the study and help us spread the word. More information can be found on our website: https://www.bcchr.ca/prism. Questions? Please contact the study team. Ashton Ellis (Study Coordinator), Tel: 604-875-2000 x7841 Email: prism@cw.bc.ca.

We greatly appreciate your support and assistance in this initiative.

(3) Did You Know?... (PHCRI/MSFHR) The Providence Health Care Knowledge Translation Community of Practice (PHC KT CoP) welcomes researchers, clinicians and other PHC staff members who want to learn with their colleagues about creative and effective ways to improve patient health through use of research evidence. The PHC KT CoP was established in 2015 to bring knowledge translation resources to health research and clinical care professionals across disciplines. The initiative is led by Aggie Black, Director, Health Services & Clinical Research and Knowledge Translation, and Emily Zamora, Clinical Resource Dietitian at PHC, with the support of PHC Research Institute and Michael Smith Foundation for Health Research. Want to attend KT CoP meetings? The PHC KT CoP meets quarterly. The agenda will include: (1) KT Concepts -- we'll have a brief discussion of a major KT concept; (2) "Brag & Steal" -- showcasing resources/tools; (3) "Share & Solve" -- sharing projects & getting input.

(4) Did You Know?... ***Sent on behalf of WHRI and Perinatal Services BC*** (PSBC/WHRI) Access to the BC Perinatal Data Registry for WHRI Members. The Women’s Health Research Institute (WHRI) is pleased to partner with Perinatal Services BC (PSBC), allowing WHRI members to have streamlined access to data from the BC Perinatal Data Registry (BCPDR) through a dedicated in-house Data Analyst at the WHRI. The BCPDR contains maternal, fetal, and neonatal health information for an estimated 99% of all deliveries and births that occur in British Columbia. From the year 2000, the BCPDR has captured approximately 45,000 births per year, including data on maternal postpartum readmissions up
to 42 days post-delivery and baby transfers and readmissions up to 28 days after birth. Access to person specific (record level) de-identified data from the BCPDR can be provided for addressing a specific set of research questions. Aggregate data without personal information that are expressed in summary form (i.e. total births, average age of mother at delivery, total cesarean sections, etc.) are also available to assist with research planning.

The WHRI is now able to accept, review, and approve data access requests, as well as providing the data, for WHRI members. We are able to offer co-ordination of the entire data access request process, including guidance, support, and advice to WHRI members who are preparing an application for BCPDR data.

You are able to apply for **research data** from the BCPDR facilitated through the WHRI if:

- You are a WHRI member, or under the supervision of WHRI member
- You require access to an **unlinked** set of data from the BCPDR. You cannot link WHRI BCPDR data with any other data.
- Your project has been approved by a Research Ethics Board.
- **You have contacted the WHRI Data Analyst prior to submission of the Data Access Request.**

You are able to apply for **aggregate data** from the BCPDR facilitated through the WHRI if:

- You are a WHRI member, or under the supervision of WHRI member.
- You are requesting data for provincial or sub-provincial (e.g. Health Authority) summary data that do not include personal information or potential identifiers.
- You require the data for the purposes of research planning only.
- **You have contacted the WHRI Data Analyst prior to submission of the Data Access Request.**

For more information on the BCPDR facilitated by the WHRI, including a list of available fields, please see our website: [http://whri.org/bc-perinatal-data-registry/](http://whri.org/bc-perinatal-data-registry/)

**Questions?** Please contact Emma Branch (WHRI Data Analyst), Tel: 604-875-2424 x4796 Email: [emma.branch@cw.bc.ca](mailto:emma.branch@cw.bc.ca)

(5) **BC Biobank Registration Program.** The program focuses on collections of human samples that are collected, stored, and used for health research.

**Inclusion Criteria:**

New biospecimen research collections that arise in the course of pursuing - basic research projects, translational research studies, clinical studies and trials, i.e. when creating a collection to support future health research.
Exclusion Criteria:

Biospecimen collections that are

- intended for clinical purposes
- part of industry sponsored studies
- stored for less than three months

Click [here](#) to get a full list of tissues and formats included and excluded in the program

Benefits and Value of the Program:

Engagement with the program will give researchers

- access to education about handling research biospecimens
- increased access to known-quality fit-for-purpose biospecimens
- the ability to draw on similar cohorts in order to validate their studies
- increased competitiveness – quality of future data generated on biospecimens of known standard can be recognized by journals and peer reviewers

For more information about why this program is being implemented download the [Health Research Council of BC Joint Statement](#).

(6) **(BC Patient Safety & Quality Council)** [A Guide to Patient Engagement](#): By inviting patients, family members and caregivers to work in partnership with your health care team, you are taking an important step to making health care better for all British Columbians. In this resource, we’ll cover the essentials of patient engagement, how to prepare for it, where you can find patient partners and how to engage them well. [Download the guide](#).

(7) **(UBC Faculty of Medicine)** [Patient-Oriented Research Repository (PoRR)](#): PoRR is a repository of patient-oriented research (POR) projects with the aim of connecting interested undergraduate students with ongoing projects at UBC. If you are a PI looking for a suitable undergraduate trainee to work on your POR project, or if you are a trainee interested in gaining experience on a research project where patient engagement has been prioritized, please visit [PoRRMed](#) for more information.

(8) **(UBC Faculty of Medicine)** [Postdoctoral Enhanced Scholar Program](#) is designed for postdocs to transition into professional positions in teaching, research, business, or clinical settings through self-directed formal training and career development. All UBC FOM postdocs are eligible to join this free program and will receive a certificate upon completion. [Read more...](#)

(9) Honeybee is a new, free recruitment platform that aims to connect researchers and participants.

Honeybee is not restricted to a specific location or demographic as our mission is to build a global community that’s more knowledgeable/educated about study participation all around. We’re based out of Toronto but trying to expand to researchers globally to match the amount of interest for research participation from users and social media followers around the world (including US and Australia!)

We are currently focusing on helping academic and hospital researchers because these areas have the most difficulty and lower budget for recruitment. We’re easily reaching the young adult (Age 18 – 25 yo) demographic via free social media marketing but we’ve
connected participants to a variety of studies including children (parents enrolling them) to older adults studies, in both healthy and diseased populations. Since we've only launched two months ago, you may have noticed that our studies are based in Toronto. But we’re working rigorously to grow and expand by connecting with major academic institutions like UBC!

Honeybee wants to help researchers with the recruitment process and to customize their platform according to user feedback. Honeybee knows recruitment can be the hardest aspect of conducting a research study; through building a community of friendly researchers and participants, we want to change the way people perceive research participation to solve this challenge, long-term. Our website was launched in May 2019. Consider joining Honeybee in building a research community together! Read more...

(10) The Canadian Cancer Clinical Trials Network (3CTN) is a pan-Canadian initiative to improve the efficiency and quality of clinical trials in Canada. 3CTN will provide support and coordination for a network of teams at cancer treatment centres and hospitals. With regional participation, 3CTN will enable sites to increase their capacity and capability to conduct academic trials. Read more...

(11) (UBC) SPARC Support and Resources: SPARC is a unit in the VP, Research and Innovation portfolio of the university that aims to assist faculty researchers by providing strategic research funding development services and resources designed to develop capacity, build collaborations, increase CIHR/NSERC/SSHRC grant application success rates, and enhance research excellence at UBC. SPARC services and resources are available to researchers at UBC’s Vancouver, Okanagan, and academic hospital campuses. Read more...

(12) Did You Know?... (CHEOS) Clinical Research 101. The Centre for Health Evaluation & Outcome Sciences (CHEOS) offers Clinical Research 101, a series of online articles to help researchers and clinicians navigate the clinical research process. Check out the latest installment "Risk Management 101" by Dana Nohynek, Director of Regulatory Affairs and Quality Assurance, who provides an overview of how and why to manage risk in clinical trials. Read more...

(13) MSFHR launches KT Pathways: Do you create or use research evidence? KT Pathways, developed in partnership with PHC, is a FREE digital assessment and learning tool designed to help you assess your knowledge translation strengths and identify potential areas for development. The tool also provides tailored training materials and support based on the results. Read more...
