The Birds and the Bees: Assessment of normal and ambiguous fetal genitalia by ultrasound

Dr. Sophie Palmer, MFM Fellow PGY6
Maternal Fetal Medicine

GOALS/LEARNING OBJECTIVES

- Develop a basic understanding of the embryology of human sexual development
- Review the normal findings of male and female fetal genitalia by ultrasound throughout pregnancy
- To discuss several recent cases of ambiguous genitalia identified on ultrasound
- To support primary prevention of the use of incendiary devices, and environmental contaminants as part of the “gender reveal” party through a brief case review of “the gender reveal gone wrong”

*** The BCW OB Ultrasound Rounds is a self-approved group learning activity (Section 1) as defined by the Maintenance of Certification program of the Royal College of Physicians and Surgeons of Canada ***
